

**Clean Version Of The Pending Claims Under 37 C.F.R. 1.121(c)(3):**

Claims 1-6 and 22-26, now pending, are submitted below in accordance with 37 C.F.R. §1.121(c)(3), which presents a clean version of the entire set of pending claims in this single amendment paper.

**1. (Once Amended) An assembly comprising:**

a device physically sized in a form factor of a PCMCIA card, the device having an interface to communicate with a storage card and memory to store user data; and

a removable storage card associated with a user that alternately enables access to the user data on the memory when interfaced with the device interface and disables access to the user data when removed from the device.

**2. An assembly as recited in claim 1, wherein the storage card comprises a smart card.**

**3. An assembly as recited in claim 1, wherein the memory comprises flash memory.**

**4. An assembly as recited in claim 1, wherein the device stores a user's profile that can be used to configure a computer.**

**5. An assembly as recited in claim 1, wherein the storage card stores a passcode and access to the user data in the memory of the device is enabled upon**

1 authentication of a user-supplied passcode to the passcode stored on the storage  
2 card.

3  
4 6. An assembly as recited in claim 1, wherein the device stores a public key  
5 and the storage card stores a corresponding private key and access to the user data  
6 in the memory of the device is enabled upon verification that the public key and  
7 the private key are associated.

8  
9 22. (Once Amended) A computer system, comprising:  
10 a computer having a PCMCIA device reader; and  
11 a smart card secured memory assembly physically sized in a form factor of  
12 a PCMCIA card to compatibly interface with the PCMCIA device reader in the  
13 computer, the smart card secured memory assembly having data memory to store  
14 user data and a removable smart card that alternately enables access to the user  
15 data when present and disables access to the user data when removed.

16  
17 23. A computer system as recited in claim 22, wherein the data memory  
18 comprises flash memory.

19  
20 24. A computer system as recited in claim 22, wherein the smart card stores  
21 a passcode and is configured to authenticate a user-supplied passcode entered into  
22 the computer as a condition for enabling access to the user data.

23  
24 25. A computer system as recited in claim 22, wherein:  
25 the smart card stores a first key;

1 the data memory stores a second key that is associated with the first key;  
2 and  
3 the smart card is configured to authenticate the second key from the data  
4 memory using the first key as a condition for enabling access to the user data.  
5

6 26. A computer system as recited in claim 22, wherein:

7 the smart card stores a passcode and a private key of a public/private key  
8 pair;

9 the data memory stores a public key of the public/private key pair; and

10 the smart card is configured to authenticate a user-supplied passcode  
11 entered into the computer as a condition for enabling access to the private key and  
12 to authenticate the public key from the data memory using the private key as a  
13 condition for enabling access to the user data.
